Preparation
Students are required to have a high school diploma. A strong science and math background in high school is an advantage but is not a requirement.

Financial Aid/Tuition
A variety of scholarships are available. El Paso residents are eligible for in-state tuition. Tuition waivers may also be available for residents of other states.

Description
The Bachelor of Science in Agriculture with a major in Soil Science is a degree administered by the Department of Plant and Environmental Sciences. The objectives of the program are to educate students in a rigorous soil curriculum with science as the basis of understanding behavior and characteristics of soil and to prepare graduates for careers in the private and public sectors as well as soil consultants.

NMSU & Las Cruces
New Mexico State University is New Mexico’s Land Grant Institution. NMSU is also a NASA Space Grant Institution, US Department of Education-designated Minority Institution, and the only Land-Grant institution also classified as Hispanic-serving by the federal government. Since 1888, NMSU has served as a comprehensive institution dedicated to teaching, research, and service at the graduate and undergraduate level. NMSU is located in Las Cruces, a community with a population of about 80,000 in a region that is rich in recreational opportunities and cultural diversity.
