† Refers to what is found on the lab's list of tests offered to clients.

‡ Quality Assessment Program. The North American Proficiency Testing (NAPT) Program (a program of the [Soil Science Society of America](https://www.soils.org/) - <https://www.soils.org/>) assists soil, plant and water testing laboratories in their performance through inter-laboratory sample exchanges and a statistical evaluation of the analytical data. Performance Assessment Program (PAP) is a voluntary program offered as a service of the Soil Science Society of America (SSSA), Madison, WI, and operated as a part of the North American Proficiency Testing program (NAPT), and is administered by the NAPT Oversight Committee.
