THE MISSION

“Provide students with international experience opportunities to stimulate their educational development.”

Aggies Go Global provides financial support to NMSU students to participate in non-credit international opportunities in conducting research for an academic project, attending conferences in their desired career field or participating in volunteer opportunities abroad.

Ghana gave me a new perspective on life. It taught me to always look for the good, be a little more adventurous and trusting, and be confident in all that I do. The world isn't going to change in two weeks, but two weeks in Ghana changed mine.

PROGRAM GOALS

Aggies Go Global is actively addressing student-identified needs by working to:

- Enhance undergraduate and graduate international learning experiences through global experiences.

- Provide a mentoring program to link student goals with NMSU’s international network

- Enhance cultural awareness and prepare informed global citizens, increasing the number of globally skilled graduates for businesses in New Mexico and around the world.

FUTURE LEADERS

The current fiscal, political, environmental, and social climate requires understanding of diverse populations and cultures. New Mexico businesses, state and local governments, and the nonprofit sector will benefit from leaders with international capabilities who are able to succeed in multinational environments.
