Overview

What better way to experience agriculture, than to see, smell and hear agriculture?

This free, two hour long event offers great activities that will teach children about dairy cattle, beef cattle, other livestock, farming, the environment, and more.

Kids & Kows & More is a fun, entertaining, educational, learning field trip geared toward 3rd grade students and their teachers.

"My students had a better understanding of the inter-relationship of agriculture and the world in which they live."

"When asked if they learned something all students enthusiastically gave a thumbs up!"

"It makes them aware of their surroundings and environment. It shows them how the agricultural world works to get them the things they use every day."

Individuals with disabilities who require an auxiliary aid, service or assistance in order to participate are encouraged to contact

2017 Program Presenters

Mobile Dairy Classroom

Southwest Dairy Farmers

Where does your milk come from? An instructor will demonstrate how to milk a cow, describe how milk goes from the farm to the consumer, and answer questions from the audience. Information about the cow's care and the positive interaction of dairies and our environment is taught.

Beekeeping

Albuquerque Beekeepers Association

Did you know :

- That a honeybee can fly approximately 15 miles per hour.
- Honey is the ONLY food that includes all the substances necessary to sustain life, including water.
- A typical beehive makes more than 400 pounds of honey per year

Your student will explore the fascinating world of beekeeping & Honey.

The Germ Detective

Southwest Border Food Safety & Defense Center & NM Farm Bureau–Ag in the Classroom

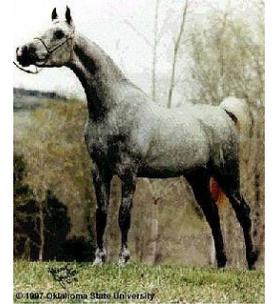

Students will learn what germs are, where they hide, and how they are spread. They will learn the importance of hygiene while working with food in the fun educational experiment.

The Horse

NMSU Cooperative Extension Service

Students will learn about the Horse industry in New Mexico and the many uses for this multi-functional uses.

The Ranching Industry in NM

NM Beef Council

The business of ranching, both its traditions and its use of technology will be demonstrated and discussed at this stop. Your students will gain an appreciation and understanding of those devoted to feeding our nation and stewarding the land and its resources.
