Produce testing and environmental swab testing for *Listeria monocytogenes* and *Salmonella enterica*

To support produce growers and processors, the NMSU Food Safety Laboratory is conducting testing for the Industry.

We will conduct swab testing for:

$25/test for 10 swabs

$20/test for 20 swabs

Product testing:

15 subsamples for Lm---$45

15 subsamples for Se---$45

This testing will provide processors with data on the prevalence and persistence of these two pathogens in the packing house/processing environment and their incidence in raw or finished product.

All results will be kept strictly confidential.

For further information, please contact Willis Fedio at 575-646-7352 (office) or 575-621-1668 (cell).
