

Alfalfa and Range Production

The 2017 Alfalfa and Range workshop at McGee Park in Farmington, NM is a unique opportunity for alfalfa and livestock producers to engage with NMSU specialists to obtain knowledge on a personal level. San Juan County ranks number two in the state of New Mexico for alfalfa production. The majority of our public and permitted land in the county is rangeland and must be managed properly to ensure profitable carrying capacities. It is critical that our producers and stockmen have the most up to date information regarding management principles, new variety research and development. The Alfalfa and Range Workshop will highlight concerns including prairie dog and gopher management; upcoming alfalfa varieties to improve production yields; noxious range weed control and overall range management.

San Juan County Cooperative Extension provides the people of New Mexico with practical, research-based knowledge and programs to improve their quality of life.

- *Shelly Hathorn, Program Director, 4-H Family and Consumer Science Agent*
- *Aaron Praetor, 4-H Agent*
- *Bonnie Hopkins, Agriculture Agent*

New Mexico State University Cooperative Extension Service

The College of Agricultural, Consumer and Environmental Sciences is an engine for economic and community development in New Mexico. ACES academic programs help students discover new knowledge and become leaders in environmental stewardship, food and fiber production, water use and conservation, and improving the health of all New Mexicans. The College’s research and extension outreach arms reach every county in the state and provide research-based knowledge and programs to improve the lives of all New Mexicans.

New Mexico State University is an equal opportunity/affirmative employer and educator. All programs are available to everyone regardless of race, color, religion, sex, age, handicap, or national origin. New Mexico State University and the U.S. Department of Agriculture cooperating.
