

New Mexico Cooperative Extension Service Publications

The **Cooperative Extension Service (CES)** operates through land-grant universities in every state to help people access research-based information about agriculture, health, economics, family life and natural resources.

The Cooperative Extension Service is located at **New Mexico State University** in Las Cruces with offices in 33 counties, many **Agricultural Science Centers**, and several district, state and tribal locations. We cooperate with federal, state and local organizations. **Extension agents** in county offices administer programs and provide expertise to their communities. **Extension specialists** at NMSU and off-campus locations interpret research and distribute information on topics of concern to New Mexicans.

The Cooperative Extension Service produces **how-to guides** and **circulars** for homeowners, gardeners, farmers and ranchers, families, and all residents of New Mexico's rural and urban landscapes.

Homeowners

- Are you watering your lawn for most efficient grass growth and water use?
- Do you need tips for home vegetable gardening in New Mexico?

Ranchers

- Are you managing rangeland weeds and brush?
- Do you need information about reproductive issues in cattle?

Farmers

- Are you developing a marketing plan for chile, pecans or produce?
- Are you considering fertilizer choices and application methods?

Families

- Are you learning to control diabetes with diet and exercise?
- Are you seeking to reduce, reuse and recycle?

CES publications are available for your use to help answer these needs and others.

The publications listed here and many others can be downloaded and printed from the **College of Agricultural, Environmental and Consumer Sciences** Web site.
