Marvel: App Version Features

To display the tool bar, on the top of the screen tap on “Show tools”. You may also display the tool bar by tapping the screen once.

Green Square: You use this tool to draw a square/rectangle. You can change the color of the square/rectangle by double tapping the square/rectangle. You can also add a border to the square/rectangle.

Yellow Circle: You use this tool to draw a circle. You can change the color of the circle by double tapping the circle. You can also add a border to the circle.

Blue Text: You use this tool to type out your text. You can change the color of the text and the font style by double tapping the text.

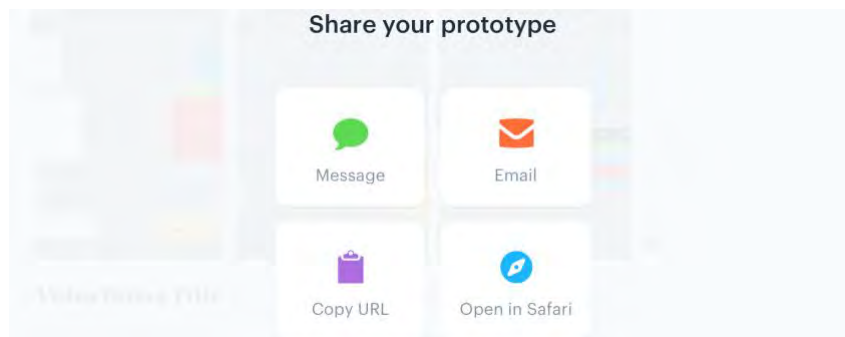

Learning Games Lab

Red Photo “Stock photos and icons”: You use this to add default images and icons that Marvel provides for you. You can also use this to add images from your computer by double tapping the image.

Purple Pencil: You use this to draw.

Gray Search tool: You use this to add default Stock Photos, Icons and Avatars that Marvel Provides for you.

Arrange: You can place an image, shape and text Forwards and Backwards. Meaning you can set a text on top (Forwards) of an image (Backwards). In the iPad version, you double tap on the object you wish to arrange. Two grayed out squares will appear. One is to arrange backwards and the other is to arrange forwards.

You may share your project with the “share button”.
