

2020 GO Bond D: \$25 million

Agricultural Modernization and Educational Facilities

Phase 2

New Mexico State University's #1 funding priority for the 2020 GO Bond D includes facilities to meet vital concerns in New Mexico:

- **Water Conservation & Rangeland Ecology**
- **Human Health & Biomedical Research**
- **Food Security & Animal Production Efficiency**
- **Student Learning & Public Outreach**

**Enhancing multidisciplinary research
and experiential learning to create a
vibrant workforce and economy
for New Mexico**

BE BOLD. Shape the Future.

Invest in New Mexico's Future

Water Conservation and Rangeland Ecology

Water quality and rangeland conservation facilities will allow faculty to address important challenges to New Mexico's urban and rural communities, including preserving our water and natural resources.

Human Health & Biomedical Research

New facilities for biomedical teaching and research will help us test cancer-fighting molecules, fight mosquito-borne diseases and engage with emerging public health concerns.

Food Security & Animal Production Efficiency

Interdisciplinary research and training will increase the profitability of New Mexico's agricultural industry as it feeds tomorrow's global population, estimated to increase by 70% in the next 30 years.

Student Learning & Public Outreach

Climate-controlled facilities will support NMSU experiential learning, community and youth events involving horses, livestock and equine-assisted therapy programs.

BE BOLD. Shape the Future.
