

College of Agriculture and Home Economics  
 Department of Animal and Range Sciences  
 REQUIREMENTS FOR AN UNDERGRADUATE MINOR IN RANGE SCIENCE

A minor in Range Science consists of 18 or more credit hours of courses in an approved plan of study. An approved minor degree application should be on file in the Department of Animal and Range Sciences, and the minor must be recorded into the Banner system by the Academic Programs Office of the College to which the student's majoring department belongs. The student should bring a copy of their transcript to a Range Science advisor to initiate the degree application process. The minor in Range Science requires 18 credits with the RgSc prefix from the list provided below. A 2.0 (C-) or greater must be earned in each class to receive credit.
