

## **Seasonal Intern**

Century Country Club is a 1924 H.S. Colt and C.H Alison design approximately 25 minutes north of New York City. This year we hosted the MET PGA Championship and proudly provided volunteers at the US Open. Century is a highly progressive club in the competitive New York Metropolitan market. We pride ourselves in staying up to date with the latest products and technology to aid us in keeping the golf course at an excellent standard.

A Toro Lynx central computer controls a Toro irrigation system with Network VP satellite controllers. At the end of 2017 Architect Keith Foster finished a two-phase renovation, which included greens expansions and regrading, regrassing green surrounds, installation of Better Billy Bunkers liners with Pro angle sand, fairway contouring, rebuilding tees, tree removal and pruning, and rerouting of natural cart paths. In addition, a short game practice facility was rebuilt and a second green was added to the complex along with a reshaped and contoured putting green. This coming year we will be finishing the master plan, which includes completing tee boxes. Our club seeks to implement projects every season to keep the course exciting for our members as well as give our greens crew challenges to learn and grow.

Century Country Club is looking for a highly motivated individual with the willingness to learn and a close attention to detail that has the goal to become a Golf Course Superintendent in the future. We are an elite private country club and will teach you what it takes to provide outstanding playing conditions. Tasks during the 2021 season will include but are not limited to mowing, fertilizing and pesticide applications (with the calibration of the needed equipment). In addition to the above, hand watering, irrigation troubleshooting, and the ability to operate all of the equipment/machinery at our facility will be associated with this internship. Our intern will be given time to spend with our Head Mechanic to learn the basic components of maintaining all kinds of golf course equipment including changing oil and air filters, sharpening blades and setting the height of cut on the machines. Exceeding expectations will result in a higher variety of given tasks.

## **Job Benefits**

On-site housing, meals (lunch and dinner), golfing privileges, uniforms/clothing

## **Salary**

\$15.00/hr, time and a half after 40 hours
