Login

Once you have signed in, you will see the Cisco AnyConnect Secure Mobility Client Download page. Click the Download for Windows button.

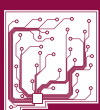

## Download & Install

Download Cisco AnyConnect Secure Mobility Client and install it on your computer.

[Download for Windows](#)

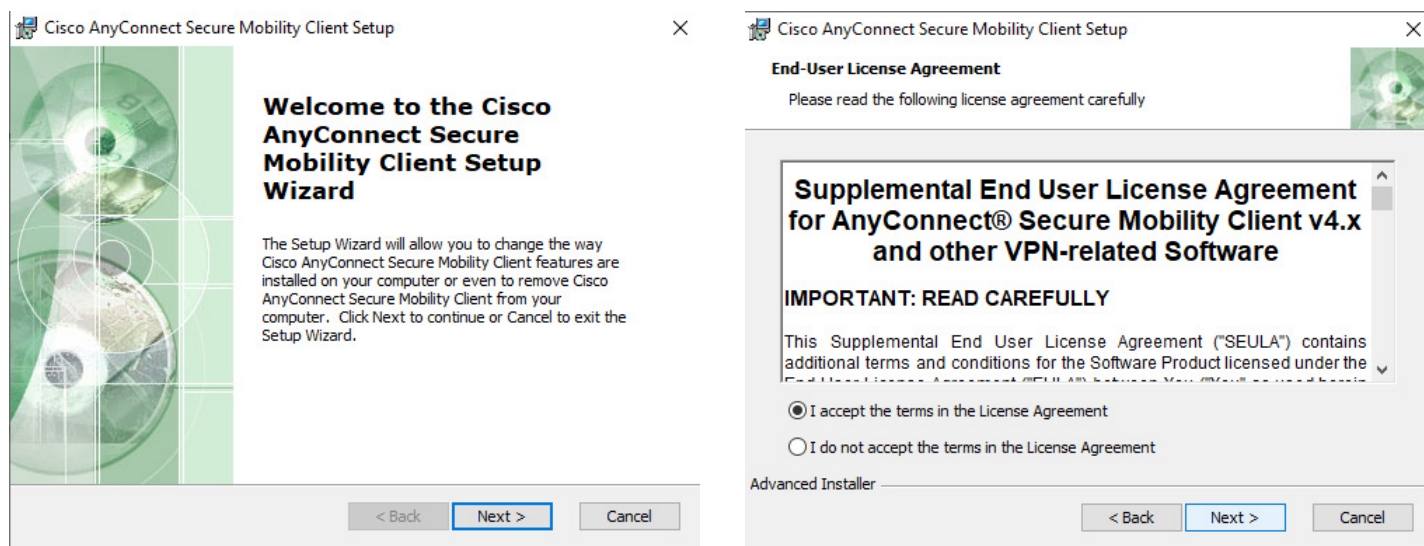

Depending on your browser, you will see the download in different locations.

- If you are using Internet Explorer or Microsoft Edge, you will see a bar at the bottom of your browser. Click “Run”
- If you are using Mozilla Firefox, a pop up will show up to save the file, and then it will be in the downloads folder at the top right for your browser. Click on the notification to install the software.
- If you are using Google Chrome, you will see the notification in the bottom left of your browser. Click on the notification to install the software.

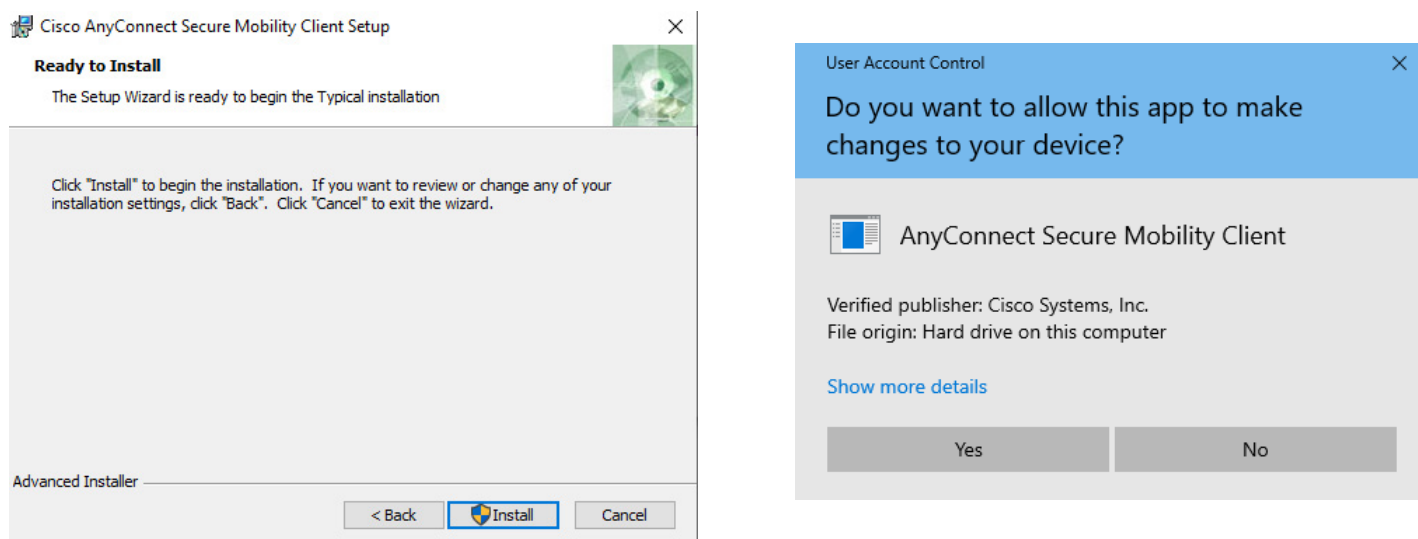

## Install the Cisco AnyConnect Secure Mobility Client

When you see the software install pop up, click “Next >”

Click “I accept the terms in the License Agreement” and click “Next >”

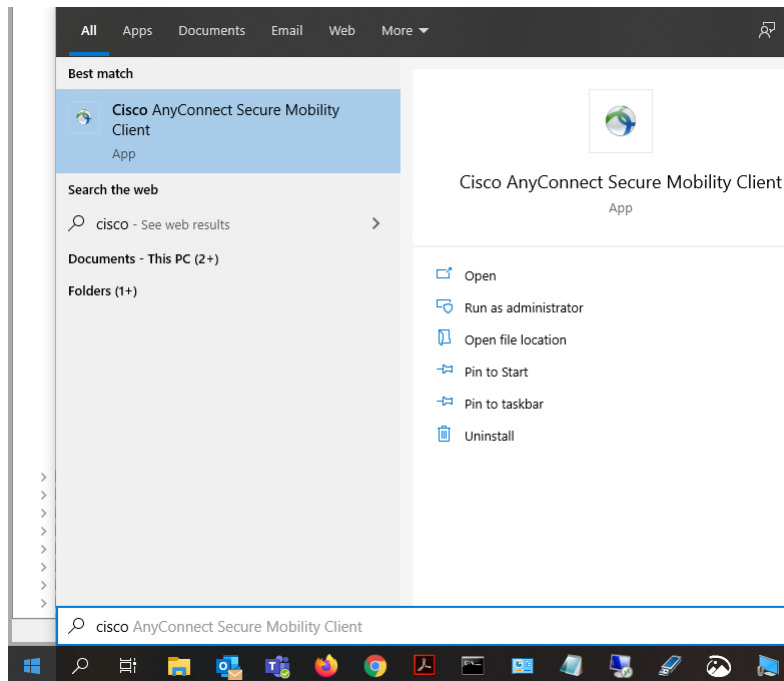

Click “Install”. It may prompt you, “Do you want to allow this app to make changes to your device?” Select: “Yes”.

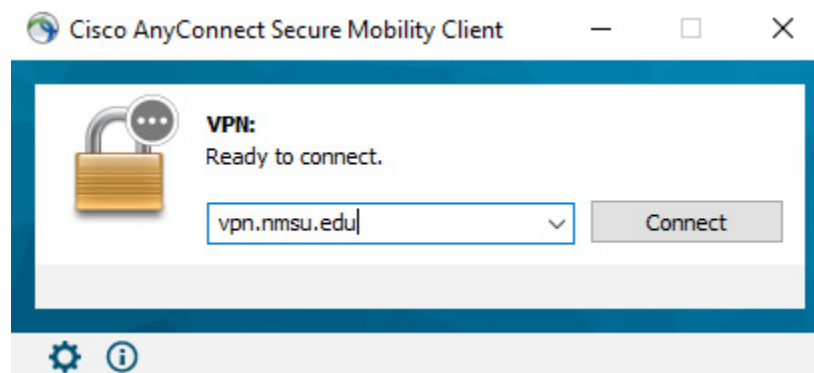

Once it has successfully completed installing, select: “Finish”.

## Opening Cisco AnyConnect VPN Client

Once you have successfully installed the software, select Windows, or the Start button in the bottom right corner, and type Cisco. You should the Cisco AnyConnect Secure mobility Client show up. Click on it to open it up.

Once you open the client, type: `vpn.nmsu.edu` in the blank area and select “Connect”.
