

ADAPTING OR REPRODUCING MATERIALS FOUND ON THE WEB FOR USE IN CES/AES NUMBERED PUBLICATIONS

When requesting permission to use published materials from journals or books, we recommend using the complete form (*Request for Permission to Reproduce or Adapt Copyright-Protected Material for Publication in New Mexico State University Agricultural Experiment Station and Cooperative Extension Service Numbered Publications*). When requesting permission to use materials found online on Web sites or in publications that are freely distributed online (versus those that require a subscription to access), an e-mail is usually sufficient

Most materials found on the Web are copyrighted

- Federal agencies (such as USDA, USGS) generally grant the public permission to use and reproduce materials they generate and post online.
- Some sources, such as some image archives, are designated copyright-free.
- Always check the copyright/permissions statement on a Web site before assuming anything about the copyright status of materials you find there.

Suggested text of email requesting permission to use or adapt copyrighted materials found on the Web:

I request permission to reproduce or adapt the material specified below in a New Mexico State University Agricultural Experiment Station or Cooperative Extension Service Numbered Publication. Citation to the original publication or appropriate credit will be published.

Include Source Citation of Material to Be Used

For Web content: Title of page; author(s) or editor(s), if known; title of section, image, or figure; date accessed; Web address

For Journals: Author(s), article title, journal, year of publication, volume number, issue number, and inclusive pages

For Books: Author(s) or editor(s), book title, place of publication, publisher, year of copyright, and inclusive pages

Include Description of Material & How It Will Be Used:

Describe specifically what part of this material you will be using and whether you will be adapting it or reproducing it. For CES, state that your publication will be printed and posted online and distributed without cost to the community, for education and outreach purposes. For AES, state that your publication is reporting research and will be distributed online for the benefit of agricultural producers, researchers, and the public.

Also give this information:

AES/CES publication title

Publication number (if known)

Name and contact information for corresponding author

Sample e-mails:

Subject: Material from Fabian Garcia exhibit online

I request permission to reproduce the material specified below in a New Mexico State University Agricultural Experiment Station Numbered Publication. Citation to the original publication will be published.

Singleton, Nena/Ed. Juan Carlos Lujan, "Garcia's Story," *Fabian Garcia: Pioneer Horticulturalist*. Accessed Feb. 16, 2009 at

<http://archives.nmsu.edu/rghc/exhibits/garciaexhibit/menu.htm>

I wish to reproduce the paragraphs below, in quotes, with attribution, in a publication about the history of the Agricultural Experiment Station:

(page 2, first column, paragraphs 4–6)

“In 1914, he was named the first director of the state Agricultural Experiment Station as well as horticulturalist. A somewhat rudimentary science by today's standards, horticulture nonetheless was significantly improved under Garcia.

His accomplishments in the field include his chile work, producing the first reliable chile pod, the beginnings of the hot ‘Sandia’ pepper, and the introduction of the Grano onion. He was instrumental in planting some of the first pecan trees in the Mesilla Valley around 1913. Some of the 35 varieties planted still stand today.

Garcia's commitment to the young college was apparent early. In 1903 when the land for the present horticulture farm was purchased, Garcia personally signed the note for the loan. ‘Then to pay it off, he planted watermelons without irrigation. For water he added hand-operated ‘pitcher’ pumps to bring in the harvest.’ recalls Dr. Joseph V. Enzie.”

The excerpt will be reproduced in Research Bulletin 999: *The History of the Agricultural Experiment Station at New Mexico State University*. This publication will be distributed online for the benefit of agricultural producers, researchers, and the public. A limited number of copies will be printed for library archives and for distribution by the authors.

Subject: Figure in “An Industry-University Response to Global Competition”

I request permission to reproduce Figure 1 in the article specified below in a New Mexico State University Cooperative Extension Service Numbered Publication. Citation to the original publication will be published.

Diemer, R., Phillips, R., & Hillon, M. (2004). “An Industry-University Response to Global Competition.” *Journal of Extension*, June 2004, Vol 42, No. 3. Accessed Feb. 16, 2009 at <http://www.joe.org/joe/2004june/a4.shtml>

Figure 1. The New Mexico Chile Task Force Draws Members from Industry, the University, and Federal, State, and Local Agencies. (A diagram of a chili pepper labeled with various factors influencing the industry)

Upon receiving your permission, I will contact the author(s) for a copy of the figure.

The figure will be reproduced in Circular 999: *Iconography of the Chile Pepper*. The publication will be printed and posted online and distributed without cost to the community, for education and outreach purposes.
