## AES Publication Review Guidelines

by Frank Sholedice, Assistant Editor

All AES publications must go through a peer review before being submitted to the AES/CES publications unit for publishing. After your manuscript is written, contact Dr. Steve Loring, AES Associate Director ([sloring@nmsu.edu](mailto:sloring@nmsu.edu)), who will coordinate the peer review process. During peer review, you may need to revise your manuscript based on comments from reviewers.

Once your publication has been reviewed and approved, Dr. Loring will submit the signed “Request for Approval of Manuscript” form (<http://aces.nmsu.edu/pubs/guidelines/documents/numpubapproval-form.pdf>), an index number for

printing archive copies, and your manuscript to the AES/CES publications unit. Your publication will then be edited, typeset, and printed.

The AES Associate Director's office pays for the printing of

copies for library archives. If you would like printed copies of your publication, you must submit a separate index number. All AES/CES publications are posted online at [aces.nmsu.edu/pubs](http://aces.nmsu.edu/pubs).
